

Iron Lady LMS

Leadership Overview · What it does, where it stands

THE PLATFORM

One platform, three programmes

Every Iron Lady participant learns, submits work, and gets coached in one place — with the CX team reviewing progress and leadership seeing it live.

LEP

Leadership Essentials
4 weeks

100BM

100 Board Members
6 months

MBW

Master of Business Warfare
1 year

- Participants progress in order: LEP → 100BM → MBW.
- Each programme unlocks only on enrolment — access is controlled centrally.
- Enrolment, payment status and logins flow in from Zoho CRM.

STATUS

It is live and in use

406

Accounts

401

Learners

517

Enrolments

47

Submissions awaiting review

THE PARTICIPANT

How a learner progresses

- She sees only the programme she is enrolled in, and resumes where she left off.
- Each phase unlocks in sequence — no skipping ahead.
- She must watch **90%** of a lesson before the assignment opens.

See it live: <https://new-lms-three-topaz.vercel.app/app/home>

THE DIFFERENTIATOR

Every submission is coached, not just marked

This is what separates the LMS from a video library — a human reviews the work and the participant must act on the feedback.

- **Approved** → she moves on. **Needs improvement** or **Rejected** → she revises and resubmits.
- Feedback is mandatory when work is sent back — the system will not allow an empty rejection.
- Work sent back does not count as complete and holds the next lesson closed.

How CX runs a cohort

- Each CX member sees only their own programme and their own batches.
- They review submissions, send reminders, and upload session recordings per batch.
- Attendance and completion are tracked per participant.

What leadership can see

- Cohort health, payment status, participant activity and task completion — per programme.
- Click any chart segment to see exactly which participants it represents.
- Admin exports users, activity and tickets to CSV for reporting.

WHERE WE STAND

Shipped • In progress

Working today

- Three programmes with full lesson journeys
- Eight submission types, incl. video and file upload
- CX review loop with mandatory feedback
- Batches, attendance, session recordings
- Analytics with participant drill-down
- Zoho enrolment and credential sync
- Mobile-first across every screen

In progress

- Automatic batch creation from Zoho
- CSV export for the CX team
- Mobile polish on data-heavy screens
- Automated testing before release

YOUR CALL

Three decisions we need

- **1. Zoho batch data.** Cohort numbers are being written into the programme field ("101 Board Members Program", "102..."). Until Zoho holds a separate batch field per programme, batches cannot be created automatically and will need manual entry.
- **2. Review capacity.** 47 submissions are waiting in the MBW queue, some several days old. Participants are blocked until someone reviews them — this needs an owner and a turnaround target.
- **3. Who sees participant contact details.** Drill-down lists show names and phone numbers. We need a decision on whether all CX staff should be able to pull a contactable list.

Thank you
